

This Listing of Claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS

Claim 1 (Previously Presented) A multilayer film comprising a windable, polymeric base material, a polymer resin layer and a metal deposited layer and/or a metal oxide deposited layer provided on the base material, wherein said polymer resin layer comprises a polymer produced by polymerization of an unsaturated compound having (a) two or more ethylenic bonds and/or (b) two or more acetylenic bonds in one molecule and having neither an acrylic group nor a methacrylic group, said polymer being present in said polymer resin layer in an amount of 80 % by weight or more based on said polymer resin layer,

wherein the thickness of said polymer resin layer is not less than 0.02 µm and not more than 1 µm, and

wherein said unsaturated compound is one or more compounds selected from the group consisting of an unsaturated fatty acid, an unsaturated fatty ester, and a terpene having an unsaturated bond.

Claim 2 (Previously Presented) A multilayer film according to claim 1, wherein the polymer resin layer is provided on the base material and the metal deposited layer and/or the metal oxide deposited layer is provided on the polymer resin layer.

Claim 3 (Previously Presented) A multilayer film according to claim 1, wherein the metal deposited layer and/or the metal oxide deposited layer is provided on the base material and the polymer resin layer is provided on the metal deposited layer and/or the metal oxide deposited layer.

Claim 4 (Canceled)

Claim 5 (Currently Amended) A multilayer film according to claim [[4]] 1,
wherein the thickness of the polymer resin layer is not less than 0.05 μm and not more than 0.5
 μm .

Claim 6 (Canceled)

Claim 7 (Currently Amended) A multilayer film according to claim [[6]] 1,
wherein the unsaturated fatty acid, unsaturated fatty ester, and terpene having an unsaturated
bond are compounds isolated from natural substances.

Claim 8 (Previously Presented) A multilayer film according to claim 7,
wherein the unsaturated fatty acid, unsaturated fatty ester, and terpene having an unsaturated
bond are compounds selected from the group consisting of a drying oil, a semi-drying oil, or a
hydrolysate thereof, or a part of the component thereof, or a combination thereof.

Claim 9 (Previously Presented) A multilayer film according to claim 8,
wherein the drying oil or the semi-drying oil is a compound having an iodine value of not less
than 100.

Claim 10 (Currently Amended) A multilayer film according to claim [[6]] 1,
wherein the unsaturated fatty acid, unsaturated fatty ester, and terpene having an unsaturated
bond are one or more compounds selected from the group consisting of coconut oil, soybean oil,
linseed oil, palm kernel oil, safflower oil, china wood oil, tall oil, linolic acid, linolenic acid,

ricinoleic acid, eleostearic acid, triglyceride linoleate, triglyceride linolenate, citral, citronellal, citronellol, nerolidol, geraniol, milsen, linalool, and limonene.

Claim 11 (Previously Presented) A multilayer film according to claim 1, said multilayer film having a property of a metallized packaging film or a metallized film for a capacitor.

Claim 12-21 (Canceled)

Claim 22 (Previously Presented) A multilayer film comprising a windable, polymeric base material, a polymer resin layer and a metal layer and/or a metal oxide layer provided on the base material, wherein said polymer resin layer comprises a polymer produced by polymerization of an unsaturated compound having (a) two or more ethylenic bonds and/or (b) two or more acetylenic bonds in one molecule and having neither an acrylic group nor a methacrylic group, said polymer being present in said polymer resin layer in an amount of 80 % by weight or more based on said polymer resin layer,

wherein the thickness of said polymer resin layer is not less than 0.02 μm and not more than 1 μm , and

wherein said unsaturated compound is one or more compounds selected from the group consisting of an unsaturated fatty acid, an unsaturated fatty ester, and a terpene having an unsaturated bond.
